

## PLASTIC DELTA TRAP

Trap many damaging moth (Lepidoptera) species with Phero Tech's inexpensive, high quality **Plastic Delta Trap**.

Phero Tech's **Plastic Delta Trap** uses a sticky removable insert and is baited with a species specific pheromone\* lure to capture pest insects.

- The **Plastic Delta Trap** comes with a replaceable insert that provides 420 sq. cm (65 sq. in.) of super sticky glued surface area.
- Each sticky insert is printed with a grid, so you can easily count your weekly catches.
- Traps come with a sturdy wire hanger.

Use **Plastic Delta Traps** and our library of quality lures to improve your monitoring and management programs.

\*Pheromones are naturally occurring chemicals that insects and other organisms use to communicate with members of their own species.

## ASSEMBLY

**Plastic Delta Traps** are easy to assemble. Open the trap so the bottom lies flat. The lure holder should be threaded through the center hole, but it can also be threaded onto a pin or finishing nail, and pushed up through the topside of the trap. Insert the sticky insert. Fold end flaps in until they “lock” into place.

## TRAP PLACEMENT

Placement of traps will vary with type of insect and crop. For tree fruits, cut away foliage or branches which may obstruct dispersal of the pheromone plume from the lure or the approach path of the responding male moth. For field crops, traps are typically positioned just above the crop canopy. Consult local experts for more specific details.

## COME TO US FOR:

- **Trapping Products:** Coloured Card Traps, Delta Traps, Diamond Trap, Wasp Trap, Wing Traps I & II, Unitrap™\*
- **Glues**
- **Pheromone Lures:** Codling Moth, Leafrollers, Mullein Bug, Peach Twig Borer, Oriental Fruit Moth and more.
- **FRUIT BOOST with QMP:** used for pollination of pear, apple, kiwifruit, blueberry and more.
